PROJECTS

E-Commerce website [🔗](#) — HTML,CSS,JS,PYTHON(FLASK),SQLITE

FEB 2025

• **About project:** Developed a functional website for selling and buying products similar to Ebay. This website allows students to easily sell or access second-hand goods. It includes various features such as chat room, user authentication, Advertising products, and more.

- Live site [here](#)

Bank Management System [🔗](#) — PYTHON, SQLITE

MAR 2025

• **About Project:** Mini menu-based driven project. By using Python and SQLITE. designed a working bank system which is able to execute almost all bank operations such as deposits, transfers, creation of accounts, etc. By integrating the sqlite database, we can ensure that user data is not lost.

- **DIGITMART** ----- HTML,CSS,MONGODB

APRIL 2025

• **About Project:** Mini E-Commerce project like Amazon. Where you can sell products and buy products and can edit prices also. Our project gives access to sellers and buyers so that can edit anything at anytime and buyers can also buy items at any time so that buyers can save time of going out and searching items endlessly.
